Monrovia, Liberia**

**Press Statement**

**Thursday, November 10, 2022:** The Liberia Institute of Statistics and Geo-Information Services (LISGIS) informs the general public that the enumeration segment of the 2022 National Population and Housing Census is set to begin across the country on Friday, November 11, 2022, as scheduled.

The required materials, including enumeration tablets, have been pre-positioned at every county capital. The deployment of the 16,595 field enumerators, supervisors, and census district officers is also in full swing.

The enumeration is expected to run until November 22, 2022. During this period, every person residing in Liberia will be enumerated. To ensure that everyone is counted, the Census Enumerators are obligated to leave a call-back card at households they may find absent, to facilitate arrangements for counting all persons.

LISGIS urges all Liberians and foreign nationals to welcome the census enumerators to their respective homes or households.

The LISGIS Management would like to inform the 17,071 trainees who participated in the 10-day training that their transportation reimbursement has been processed for payment on Saturday, 12, and Monday, 14 November 2022. The fees are being made in two batches because of the time required by the GSM companies to verify the list of trainees against their mobile money numbers. Additionally, the facilitators of the training of Census Enumerators have all been paid.

Meanwhile, the Management of LISGIS remains thankful to the House of Representatives for appropriating Two Hundred Thousand United States Dollars to LISGIS to help ease the challenges of paying some of the persons that participated in the field personnel recruitment process. LISGIS is also thankful to training facility owners across the country for their cooperation.

LISGIS reaffirms its commitment to deliver the 2022 National Population and Housing Census as it remains the only means through which the country's population can be determined, and important information on health, education, and social-economic development can be available to aid development planning.

As an individual, you count, therefore, make yourself available and be counted.
